Name: Holzer

First name: Stefan

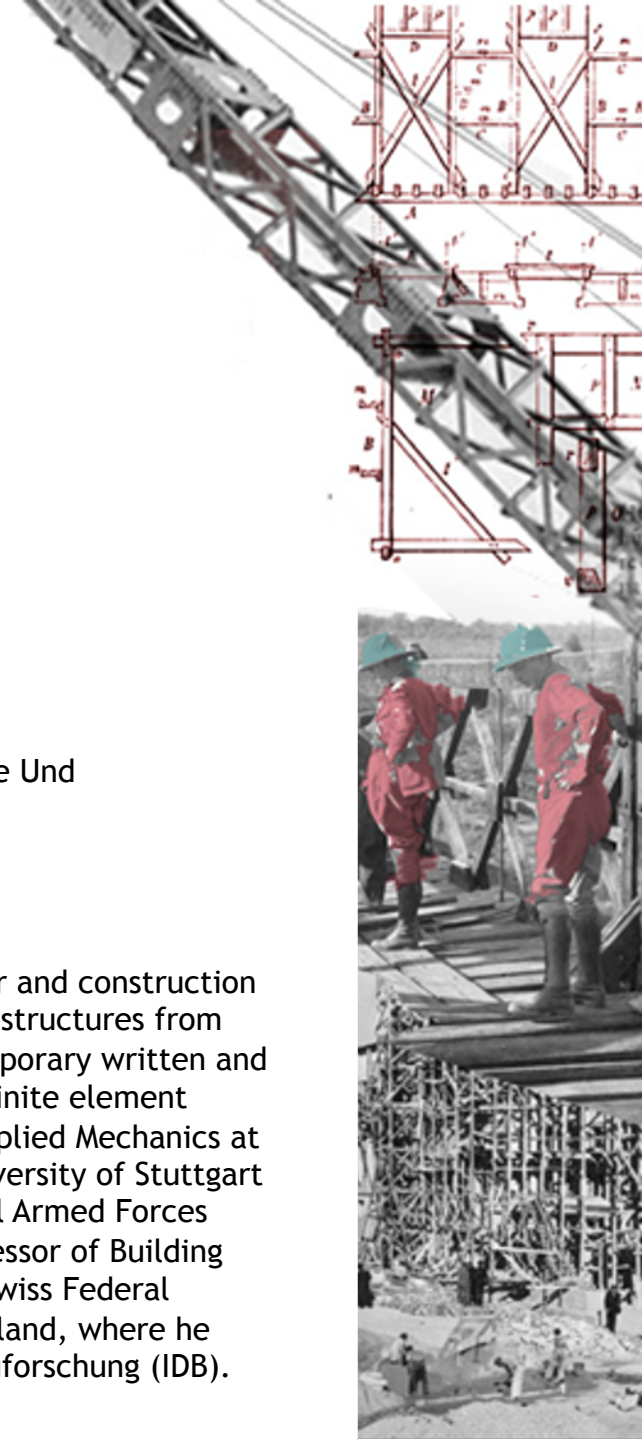

Function: Professor

Affiliation: Eth Zurich, Institut Denkmalpflege Und
Bauforschung

Country: Switzerland

Email: holzer@arch.ethz.ch

CV: Stefan M. Holzer (1963) is a civil engineer and construction historian focusing on all aspects of historical structures from on-site surveys through evaluation of contemporary written and pictorial sources to numerical analysis with finite element methods. Having worked as a Professor of Applied Mechanics at the Civil Engineering departments of the University of Stuttgart (1995-2001) and the University of the Federal Armed Forces Munich (2001-2016), he is currently Full Professor of Building Archeology and Construction History at the Swiss Federal Institute of Technology (ETH) Zurich, Switzerland, where he heads the Institut für Denkmalpflege und Bauforschung (IDB).

7ICCH

Seventh International Congress on Construction History

Stefan Holzer has published a large number of research articles on construction history and, notably, several monographs, including a two-volume work on engineering assessment of historic structures (2013/2015). His research is at present centred on Early Modern and 19th-century construction history, with particular attention to timber and masonry construction.
