CV: Beatriz Mugayar Kühl graduated in Architecture (1998) from the Faculty of Architecture and Urbanism, University of São Paulo (FAUUSP), Brazil. She holds a Certificate of Advanced Studies in the Conservation of Historic Towns and Buildings (1990) and Master's Degree (1992), from the Raymond Lemaire Centre for Conservation, Katholieke Universiteit Leuven, Belgium. She also has a PhD (1996), FAUUSP, Post-doc (non-consecutive) from Sapienza University of Rome (2001-2005). She is Professor of Architectural History and Preservation at the Department of History of Architecture, FAUUSP, since 1998 (Full Professor since 2017).

7ICCH

Seventh International Congress on Construction History

For more than twenty years, Beatriz Mugayar Kühl has dedicated herself to research related to industrialization processes in the state of São Paulo, with a special interest in railways, a theme that has been developed in further research since her doctorate. Her investigations focus on the role of the railways in structuring the territory and landscape, the materials and techniques used and their role in transforming design and construction processes.

Her several publications include the books *Preservação do patrimônio arquitetônico da industrialização* [The Preservation of Industrial Architecture] (Cotia, Ateliê / FAPESP 2009) and 2018; *Arquitetura do Ferro e Arquitetura Ferroviária em São Paulo* [Iron Architecture and Railway Architecture in São Paulo] (Cotia, Ateliê / FAPESP, 1998).
